PRIYESH SINGH

B.Tech CSE (AI & Data Science) | Aspiring AI/ML & Data Scientist

Priyesh666 | Priyesh Singh | priyesh666singh@gmail.com | +91 7488441171

Summary

B.Tech Computer Science (AI & Data Science) undergraduate with an 8.00 CGPA and hands-on experience building and deploying Generative AI applications. Completed the IBM SkillsBuild Internship, developing an AI-powered nutrition assistant on IBM watsonx.ai. Comfortable across the ML/AI stack, from prompt engineering and model integration to Python-based web deployment.Ready to leverage strong technical foundations and model integration skills to build scalable AI products.

Education

Bachelor of Technology — Computer Science (AI & Data Science) 2024 – 2028 (Ongoing)

Poornima University | *CGPA: 8.00 (through 4 semesters)*

Internship Experience

AI & Cloud Technologies Intern — IBM SkillsBuild (via AICTE / Edunet Foundation)

June 2026 – July 2026

- Built and deployed **NutriGuide**, an AI-powered nutrition assistant on IBM watsonx.ai, delivering personalized meal recommendations to test users through a Streamlit web interface.
- Iterated on prompt design across multiple test cycles, improving response relevance and reducing generic/off-target outputs.
- Integrated the watsonx.ai model with a Python/Streamlit front end, handling API calls, input validation, and response formatting end-to-end.
- Gained applied experience in Generative AI workflows, IBM Cloud services, and deploying AI applications for real users.

Projects

NutriGuide — AI Nutrition Agent [GitHub Repo] [Live Demo] *Python, watsonx.ai, Streamlit*

- Built an AI nutrition assistant that generates personalized meal and diet recommendations from user inputs (goals, dietary restrictions, preferences) using IBM watsonx.ai foundation models.
- Designed a Streamlit interface for real-time interaction and applied structured prompt engineering to keep responses accurate and on-topic.

AI-Powered Cybersecurity Threat Detection System [GitHub Repo] *Python, Machine Learning, Data Visualization*

- Designed an ML-based system to flag suspicious logins, malicious URLs, and network anomalies using classification models trained on labeled security event data.
- Built a real-time monitoring dashboard with automated alerts to visualize detected threats and support faster incident response.

Technical Skills

Programming Languages: Python, Java, C

AI / ML: Generative AI, Prompt Engineering, IBM watsonx.ai, scikit-learn (basics), Data Structures

Web & Frameworks: Streamlit, HTML, CSS

Databases: MySQL

Tools & Platforms: Git, GitHub, VS Code, IBM Cloud

Core CS Concepts: Data Structures, Object-Oriented Programming

Certifications

- Oracle AI Foundations Associate — Oracle
- Python (Basic) — HackerRank
- SQL (Basic) — HackerRank
- IBM SkillsBuild — Artificial Intelligence & Cloud Technologies Internship Completion
